Spread: 15-23"

Exposure: full sun to partial shade

Water: moderate, increase in summertime

Hardiness: temperatures as low as 38 degrees

Super Blue

Light Blue Bicolor

Patio Containers, Outdoor Bedding, Indoor Plant

Bred by Suntory Flowers in Japan, Senetti is a collection of pericallis hybrids, which were obtained by cross breeding members of the Compositae and Asteraceae families. Before reclassification, Senetti was known as a cineraria hybrid, but Senettis are nothing like seed-grown cineraria grown as a house plant. Their large, daisylike flowers bloom from early spring until summer. Bloom count can be as high as 200 on a plant grown in a 10-inch pot. Senetti also has a unique re-blooming ability. Cut plants back 50 percent for a fresh flush of blooms. Plants will stop flowering when temperatures are 80 degrees

Offered in 9" Planter
